bravery rise of the last hero

Within my 22 minutes of gameplay it crashed 6 times and when it didn't crash it was almost unplayable. Cool concept, awful implementation.. Great game! Play it on highest difficulty!. Launching this game reminded me of counter strike as I was blasted with loud music. Luckily the options menu was very easy to find to turn that down. Once I had it down I had time to enjoy the simple and good looking main menu. This app company did a great job with this and it was super easy and aesthetically pleasing to navigate around the game. In my short time playing, I got pretty good at it and only found two small problems. The first might be a feature, but I found it annoying to switch directions twice and get stuck in place. It's a small complaint and it doesn't matter that much but I wanted to mention it anyways. My second problem was the sounds used for leveling up in both game modes. Both sounds are ripped from Counter-Strike Global Offensive, it first plays the case opening noise than the sound just before a death cam in deathmatch. Other then this I had a great time playing and I would recommend this to anyone who has free time on their hands. Geometry Rush is super smooth and plays out great with it's simple but eye catching art style.

=Add new sounds!=. One man development team that has done a great job relative to resources and assets available. Congrats to Jorge for reaching release! If you like Nexus/Homeworld this is a fun game that, while lacking the polish of a fully staffed development studio, is fun and engaging.

For the price it is a steal!. So far this is after one game - I'll update if anything is different after further games. This is to the ancient game HnefTafel what Battle Chess is to Chess. It gives a game played like HnefTafel with some variations on what you choose for special pieces, table, etc, but gives you little animated battles between the pieces. However it is from the same time period as the original Battle Chess so very pixelated and at times difficult to see clearly on a modern screen. But I enjoyed the game and appreciate having a Battle Chess version of this ancient game as well. I look forward to trying it more.

I would recommend this for those interested in games like Battle Chess that don't mind the aged graphics and it running in Dosbox.

A little middling Tower Defense game. Graphics and effects are decent, but consume an excessive amount of hardware. There are only 4 kind of towers, each can be upgraded of two ways by a system of coins and gems. Foes are diverse. Brings 3 campaigns, other 3 must be purchased by downloadable content, a dirty trick. Maps can be repeated 2 or 3 times en each campaign. It is too easy, perhaps is good to introduce children in the genre, but for an adult only serves to pass whiles and forget. Complete all game with 100% achievements takes about 36 hours. Its a mere explotation of the great Kingdom Rush. Only to buy with a high discount or in bundles.. narrative....well lets call it coldwar 2.0

or as an recruitment helper..... game for arcade cabinet in US Marine's drafting place...

as Rail shooter from military background...IT's ok. Not quite as good as BLUE ESTATE, nowhere near. But given fact of MILITARY subgenre of RAIL SHOOTER thin scene....it will do.

Well until it starts to freeze whole PC (no other game did so since this pc build,AAA)

But true is, I did not bother to troubleshoot.Never had lightgun hooked up, so no point there. (wondering if it will be much of nightmare to make it work on this title.Will post update if so.). Hell of an interesting game -- give it a try!. This game is terrible and hard to play. There are seemingly impossible tracks that you MUST pass to continue, and no matter how many times I try and perfect my path to the end, it's still not possible. No wonder this game has a score in the 30s.. Really fun arcade racer (think of a mixture of Dirt 2/3/Showdown and Motorstorm) that looks, feels and runs great.

I especially like the Wild Rush races since I'm a big fan of the Motorstorm series.

. Freebie is a game that is REALLY EASY and fun if you play cassually. I got the badge for this game on my second day of playing it and got a 100 % on this game. FREEBIE IS NOT FREE THOUGH JUST REMEMBER THAT. This game is nothing special and I got a coupon on this game so yeah. I give this game 7/10.
